AI AUTOMATION & MARKETING PIPELINE EXPERTISE

End-to-end proficiency in designing, building, and scaling intelligent automated marketing and CRM systems:

- **n8n Workflow Automation:** Designed multi-stage marketing pipelines using n8n — orchestrated automated workflows connecting lead capture forms, CRM systems, email sequences, WhatsApp follow-ups, and Google Sheets reporting in a single integrated pipeline, eliminating manual hand-offs entirely.
- **Antigravity Automation:** Leveraged Antigravity for advanced automation tasks including dynamic audience segmentation, triggered campaign activation based on user behaviour signals, and real-time data synchronisation across marketing platforms.
- **CRM Automation Across Platforms:** Built and maintained CRM automation and record-syncing workflows spanning HubSpot, Salesforce, Zoho CRM, and Pipedrive — covering lead scoring rules, pipeline stage updates, and customer journey triggers.
- **Zapier & Make Integration:** Built cross-platform automation bridges using Zapier and Make (Integromat) — automated CRM record updates, social scheduling, campaign performance alerts, and cross-channel data syncing, reclaiming 8–10 hours of manual effort per week.
- **AI-Assisted SEO Pipeline:** Deployed AI-assisted SEO automation pipelines — automated keyword gap identification, competitor SERP monitoring, AI-generated content briefs, and internal linking recommendations — accelerating content production velocity by 3x.
- **Prompt Engineering & AI Productivity:** Applied structured prompt engineering to AI writing and SEO tools to accelerate content briefs, ad copy variations, and campaign reporting summaries, improving team output speed.
- **Lead Nurturing Automation:** Constructed automated lead nurturing funnels — email drip sequences, WhatsApp re-engagement chains, and retargeting audience refreshes — triggered by behavioural signals to reduce lead response time and improve funnel conversion rates.
- **Automated Analytics Reporting:** Built real-time performance reporting dashboards on Google Analytics 4 and Looker Studio, with automated scheduled delivery — eliminated manual reporting cycles and provided stakeholders with always-current campaign intelligence.
